## PART 2: Your Aims

What are your reasons for taking up Pilates?

---

---

---

What health or physical goals would you like to achieve over the next three months?

---

---

---

What longer-term health or physical goals would you like to achieve over the next 12 months?

---

---

---

## PART 3: Important Information

Please advise us before commencing any session if, for any reason, your health or your ability to exercise changes.

It is inadvisable to do Pilates between weeks 8 to 14 of pregnancy, unless by special arrangement with your teacher. It is also wise to wait six weeks after the birth before resuming exercise.

Pilates exercises are very safe but, as with all forms of physical exercise, it is prudent to consult your doctor before starting Pilates sessions.

These sessions are not a substitute for medical counselling or treatment. If you have any doubts about the suitability of the exercises, you should refer back to your medical practitioner. The teacher can accept no liability for personal injury related to participation in a session if:

- your doctor has, on health grounds, advised you against such exercise.
- you fail to observe instructions on safety or technique.
- such injury is caused by the negligence of another participant in the class/studio.

Exercise should be performed at a pace which feels comfortable for you. PAIN is the body's warning system and should NOT BE IGNORED. Please inform your teacher immediately if you feel any discomfort during a session. Please also inform the teacher if you felt any discomfort after a previous session.

I understand that Body Control Pilates exercises involve hands-on correction and I hereby consent for my teachers to work in this way.

I confirm that I have read and understood the above advice and that the information I have given is correct.
